

TOPS[®] Quality

ADVANCED STORAGE & DISPENSING

Our space-saving fluid systems are simple, dependable, versatile, smarter, and stronger. All tank sizes can be stacked with each other, in any combination, without requiring any converting brackets. Third party tested for dynamic compression, internal pressure, and stack test evaluations. These tanks are designed to be placed on the Universal Tank Stand or on a flat surface.

> T-1110 80 gallons 36"x36"x18"

T-1210 120 gallons 36″x36″x27″

T-1410 240 gallons 36″x36″x49″ T-1510 325 gallons 36"x36"x66"

Interlocking top and bottom ridges for secure stacking 2" opening for pump or vent

1" opening for desiccant breather or remote fill

Convenient 2" Fill Opening Six molded-in brass inserts for pump mounting plate attachment

Tank level Gauge, quickly see approximate inventory Industry's only molded-in 1" NPT brass inserts for drain openings

CAGED TANK OPTIONS

Tank, Stand Base (no legs), and Cage.

Cages increase structural support and Security. Additional caged options available

FEATURES

- High density polyethylene construction
- Stackable in any combo No converting brackets required
- Convenient center fill
- See approximate fluid levels
- Standard 3' x 3' footprint

TOPS offers a complete line of tanks including square stackables, caged systems and containment vessels. Our tanks eliminate the hassles of handling 55 gallon drums. Clean up your work area; maximize your valuable floor space - stack multiple fluids vertically in bulk. Superior tank designs, complimented with rugged, heavy-duty components give our customers confidence that their fluids are safely stored inside our complete, total tank package.

PUMPS

These pump systems provide dispensing direct from the tank to your equipment.

We have more pump options available from electric to pneumatic, high to low pressure, call us today.

[MODEL #	TYPE	ASSEMBLED	INCLUDES
